Contents

Introduction 1

Research on the Benefits of Manipulatives 2

How to Use This Book 6

A Walk Through a Lesson 8

NCTM Correlation Chart 10

Number and Operations 14

Lesson 1 Converting Fractions, Decimals, and Percentages 16

Lesson 2 Fraction, Decimal, and Percentage Combinations that Equal 1 18

Lesson 3 Estimating Fractional Numbers 20

Lesson 4 Comparing Rational Numbers 22

Lesson 5 Ratio and Proportion: Finding the Ratio 24

Lesson 6 Ratio and Proportion: Solving the Equation 26

Lesson 7 Approximating Square Roots 28

Lesson 8 Ratio and Proportion: Pattern Blocks 30

Lesson 9 Scale Factor 32

Lesson 10 Integer Operations: Addition 34

Lesson 11 Integer Operations: Subtraction 36

Lesson 12 Integer Operations: Multiplication 38

Lesson 13 Integer Operations: Division 40

Geometry 42

Lesson 1 Properties of Geometric Shapes 44

Lesson 2 Triangle Sum Theorem 46

Lesson 3 Exploring Quadrilaterals: Sides and Angles 48

Lesson 4 Polygons: Exploring Area 50

Lesson 5 Polygons: Sums of Interior Angles 52

Lesson 6 Solid Figures: Prisms, Pyramids, and Cylinders 54

Lesson 7 Prisms, Pyramids, and Cylinders: Drawing a Net 56

Lesson 8 Exploring Solids: Surface Area 58

Lesson 9 Prisms and Pyramids: Volume 60

Lesson 10 Cylinders and Cones: Volume 62

Lesson 11 Parallel Lines Intersected by a Transversal 64

Lesson 12 Euler's Polyhedron Formula 66

Lesson 13 Pythagorean Theorem 68

Lesson 14 Reflections (Flips) 70

Lesson 15 Translations (Slides): The Traveling Triangle 72

Lesson 16 Rotations (Turns) 74

Lesson 17 Dilations 76

Algebra 78

Lesson 1 Linear Functions 80

Lesson 2 Variables: x, x^2, and Constants 82

Lesson 3 Combining Like Terms 84

Lesson 4 Slope as Rate of Change 86

Lesson 5 Lines in Slope-Intercept Form 88

Lesson 6 Problem Solving with Rates of Change 90

Lesson 7 Symbolic Algebra 92

Lesson 8 Algebraic Equivalencies: Distributive Property 94

Lesson 9 Algebraic Equivalencies: FOIL Method 96

Lesson 10 Solving Linear Equations 98

Lesson 11 Solving Nonlinear Equations 100

Lesson 12 Solving Systems of Equations 102

Lesson 13 Problem Solving: Two-Step Linear Equations 104

Lesson 14 Problem Solving: Multiple-Step Nonlinear Equations 106

Lesson 15 Linear Relationships 108

Lesson 16 Writing Equations 110

Measurement 112

Lesson 1 Area of Trapezoids 114

Lesson 2 Area of Irregular Figures 116

Lesson 3 Constant Perimeter and Changing Area 118

Lesson 4 Perimeter of Irregular Shapes 120

Lesson 5 Triangles: Angles and the Sides Opposite Them 122

Lesson 6 Triangle Inequality 124

Data Analysis and Probability 126

Lesson 1 Population Sampling 128

Lesson 2 Measures of Central Tendency 130

Lesson 3 Graphical Representations I: Histograms and Circle Graphs 132

Lesson 4 Graphical Representations II: Circle Graphs and Percentages 134

Lesson 5 Finding Probability Without Replacement 136

Lesson 6 Probability: Fair and Unfair Spinners 138

Lesson 7 Simple Compound Events 140

Lesson 8 Theoretical vs. Experimental Probability Game 142

Lesson 9 Mutually Exclusive Events 144

Lesson 10 Build a Spinner 146

Lesson 11 Scatter Plot Diagrams 148

Lesson 12 Line of Best Fit 150

Blackline Masters

BLM 1 Fraction Tower® Number Lines 152

BLM 2 Double Fraction Tower Number Lines 153

BLM 3 Algeblocks® Basic Mat 154

BLM 4 Algeblocks Quadrant Mat 155

BLM 5 Pattern Blocks Funnel 156

BLM 6 Centimeter Grid Paper 157

BLM 7 1-Inch Triangular Grid Paper 158

BLM 8 Cylinder Net 159

BLM 9 Triangular Prism Net 160

BLM 10 Square Pyramid Net 161

BLM 11 First Quadrant Coordinate Dot Paper 162

BLM 12 $\frac{1}{4}$-Inch Grid Paper 163

BLM 13 1-Inch Grid Paper 164

BLM 14 Algeblocks Sentences Mat 165

BLM 15 Centimeter Dot Paper 166
