

Social Distancing Floor Decals

Encourage a healthy distance of 6-feet with easy to apply floor decals!

These playful decals will add a splash of color anywhere people need to socially distance. They are made with a durable, waterproof, washable vinyl material for use both indoors and outdoors*.

You can place the decals on concrete, tile, and even carpet (loop pile) floors. Use them to direct foot traffic and as a friendly reminder to stand 6 feet apart.

Application

- Clean and dry floor thoroughly before applying decals.
- Remove backing and apply where desired.
- Apply pressure with a squeegee or other flat edge tool like ruler or credit card, work left to right to remove any air bubbles.
- Do not apply if temperature is below 40°F.

Removability

- This product is removeable for up to 6 months with no residue, under normal exposure.
- May peel up tiles if the tiles are not firmly attached to the sub floor.
- May remove paint from a painted floor. Test the paint adhesion first.
- When you are ready to remove the decals use two hands, start at the top of the graphic and pull it slowly at a 120 to 180-degree angle.
- Whenever large graphics are difficult to remove, cutting the graphic into strips may ease the removal process. Just be careful not to cut the surface it is adhered to.
- Heat may be helpful if the surface is not wallboard. Heating a graphic eases removal of almost any film.
- Heat softens the adhesive, which reduces the pull-off force.

Cleaning

- Use water and chemicals sparingly when cleaning.
- Excessive amounts of water or harsh chemicals may cause the graphic to fade or flake.

** In extreme weather conditions, the adhesive can weaken or fail, and/or the laminate's non-skid characteristics can become compromised.*
