Find the Distance
Strategy: Subtract 2-Digit Numbers Part 1

Model each subtraction problem on the number line. Then, find the distance. The first and third problems are done as examples.

1. $47 - 8 = 39$

2. $33 - 4 = \_\_\_\_\_\_\_\_$

3. $42 - 38 = 4$

4. $61 - 57 = \_\_\_\_\_\_\_$
