Find the Distance
Strategy: Subtract 3-Digit Numbers Part 1

Model each subtraction problem on the number line. Then, find the distance. The first and third problems are done as examples.

1. \(104 - 7 = 97\)

2. \(161 - 6 = \)________

3. \(171 - 168 = 3\)

4. \(153 - 146 = \)_______
