Keep the Same Distance Strategy: Subtract 3-Digit Numbers Part 1

Model each subtraction problem on the number line. Then, find the difference.

1. $150 - 45 = \underline{\hspace{2cm}}$

2. $138 - 33 = \underline{\hspace{2cm}}$

3. $170 - 23 = \underline{\hspace{2cm}}$

4. $161 - 14 = \underline{\hspace{2cm}}$

How are problems 1–2 and 3–4 related to each other?
