Determine Fair Share of a Whole Number

For each of these situations, determine each person’s fair share. Use any method to determine the fair share. Show your work in the blank space. Then, write an equation to match the situation.

1. Nicolas and his friend share 11 bananas.

Equation: ________________________________

2. 6 friends share 9 graham crackers.

Equation: ________________________________

3. 8 friends share 10 pies.

Equation: ________________________________
4. 3 friends share 8 oranges.

Equation: ________________________________

5. 6 friends share 4 pizzas.

Equation: ________________________________

6. 6 friends share 20 apples.

Equation: ________________________________
Jennifer Bay-Williams is a passionate mathematics educator at the University of Louisville, Kentucky. She has written many books, including Math Fact Fluency, Elementary and Middle School Mathematics: Teaching Developmentally and Teaching Student-Centered Mathematics, all of which take different angles at trying to ensure mathematics teaching engages every student.

Bay-Williams is involved with many organizations related to mathematics teaching. She is a member of the National Council of Teachers of Mathematics (NCTM) Board of Directors, a former president of the Association of Mathematics Teacher Education (AMTE), and active in TODOS: Mathematics for All.
